1. Purpose

DETOX TO ZERO by OEKO-TEX® is a comprehensive verification and reporting system that recognises the requirements stipulated by the Greenpeace Detox campaign. The service includes an audited assessment based on transparent DETOX TO ZERO criteria and methods for establishing environmentally responsible textile and apparel facilities. The verification process involves the reduction of hazards and risks across the entire textile production chain, from fibre production through to the make-up of products, with the goal of moving towards a greener chemistry.

DETOX TO ZERO assesses, audits and reports on the following areas of the textile production chain:

1. Wastewater and sludge conformity in accordance with the DETOX TO ZERO by OEKO-TEX® Manufacturing Restricted Substance List (MRSL)
2. Conformity of chemicals stored in the company as per the DETOX TO ZERO by OEKO-TEX® MRSL
3. General management

DETOX TO ZERO by OEKO-TEX® is guided by the following principles:

Elimination: To eliminate the release of any toxic chemicals and recognise that there are no environmentally safe levels for hazardous substances according to the Greenpeace priority list of the eleven chemical groups.

Prevention and precaution: To take precautionary action with the aim of eliminating hazardous chemicals in the face of scientific uncertainty. To interrogate processes and introduce measures for continuous improvement in the company in terms of preventive measures for the handling and use of 'hazardous' substances.

Right to know: To act with transparency on behalf of communities living by the discharge pipes and consumers, who both have a right to know about the hazardous chemicals being released into our waterways. Documentation of the company's operations, such as training, environmental reporting, internal and external communication. One of the targets is a publicly accessible register on the www.oeko-tex.com website.

2. Applicability

DETOX TO ZERO by OEKO-TEX® addresses chemical / environmental performance in textile production processes such as:

- Wet spinning and related processes (e.g. Viscose, Modal, Acetate, Acrylic)
- Dyeing, printing, finishing, coating and related processes
- Manufacturing of accessories (e.g. zippers, buttons, labels)
- Others (e.g. non-agricultural fibre production)

The DETOX TO ZERO guideline is presented as a normative document issued and updated regularly by OEKO-TEX®. The guideline specifies the conditions and requirements for working with DETOX TO ZERO. The overarching goal of the guideline is to help production facilities to measure and improve environmental performance with the aim of moving towards a greener chemistry and to report this to the industry and consumers in a transparent and useful format.

Limitation of DETOX TO ZERO:

Customers shall be in compliance with discharge permits and national legal requirements independently of being below or above the given reporting limits of the MRSL in Annex 2.

3. Content of DETOX TO ZERO by OEKO-TEX®

DETOX TO ZERO includes the evaluation of wastewater and sludge tests, a full check of the chemical inventory and an assessment of the company management.

3.1 Wastewater and sludge testing

Customers interested in receiving a meaningful DETOX TO ZERO scoring should be prepared to have results of analytical wastewater and sludge tests available. There are currently twelve groups of chemicals that are the focus of DETOX TO ZERO. The twelve chemical groups are:

1. Alkylphenols (APEOs)
2. Phthalates
3. Brominated and chlorinated flame retardants (BFRs, CFRs)
4. Azo dyes
5. Organotin compounds
6. Perfluorinated chemicals (PFCs)
7. Chlorobenzenes
8. Chlorinated solvents
9. Chlorophenols
10. Short chain chlorinated paraffins
11. Heavy metals such as cadmium, lead, mercury and chromium (VI) and
12. PAH's and General requirements

The MRSL in Annex 2 serves as the basis for a MRSL screening and wastewater and sludge testing. All of the chemicals for each group and the defined reporting limits should be considered.

The DETOX TO ZERO process requires the facility to provide an up-to-date wastewater and sludge testing report. The wastewater and sludge test shall be performed from a sample that represents normal production being taken independently from the accredited laboratory conducting the testing at the output of the facility. In the test report shall be recorded the location, the date and time when the sample was collected along with the name of the person responsible of taken the sample with its signature. An OEKO-TEX® approved auditor will verify if the test results are in compliance with the reporting values of the DETOX TO ZERO MRSL. OEKO-TEX® acknowledges testing results from any accredited testing laboratory.

3.2 Chemical inventory list

An inventory list of all chemicals used in production should be available. The list should be complete and at least contain product name (trade name or chemical identification) and CAS number of all substances. At minimum, the latest Safety Data Sheet (SDS) for all of the chemicals in use (both production-relevant and non-production-relevant) should be available. The chemicals list can be supplemented with the following information:

- Classification of the chemical based on its physical, health and ecological risks as per the GHS (globally harmonized system)
- Composition of the individual chemical components of the chemical (including their percentage values) and the corresponding CAS number(s)
- Hazard codes (GHS code, H and P codes) for the named individual chemical substances
- Registration information for the chemical substances (EINECS number, EC number, REACH registration number, etc.)
- Minimum, maximum and actual stock of the chemical
- Place where the chemical is stored and used

3. Content of DETOX TO ZERO by OEKO-TEX®

The chemical inventory should not only contain the chemicals used in production processes, but also the chemicals used in other applications, such as for cleaning, maintenance, etc.

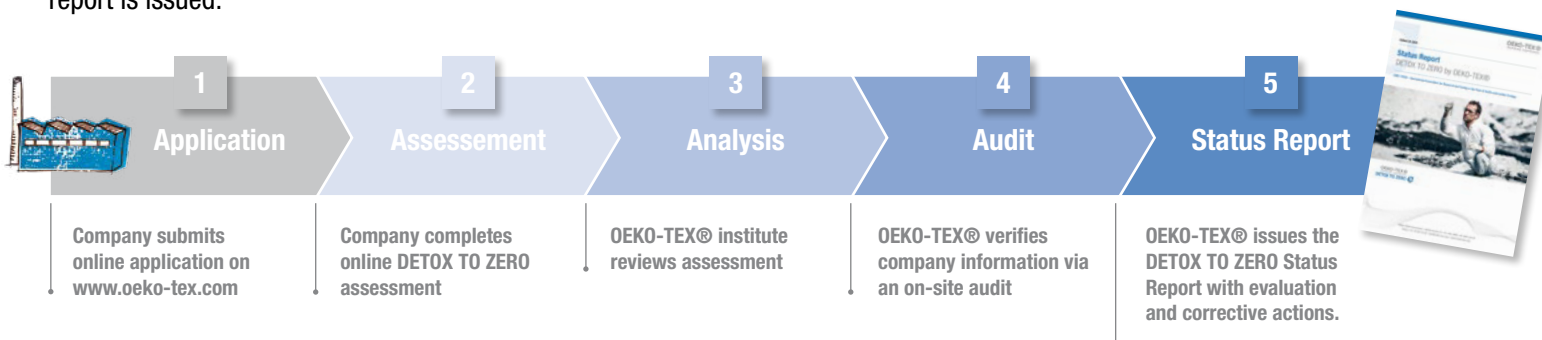

3.3 General management

The general management part of DETOX TO ZERO covers the following aspects:

- Management system / structural organisation with focus on chemical and environmental performance
- Compliance with permits and legal requirements
- Storage and handling of chemicals, auxiliaries, dyes, solvents etc.
- Environmental protection, waste management and production processes
- Reuse and recycling of residues
- Health and safety of employees, use of PPE and training

4. Process to receive a DETOX TO ZERO Status Report

After registering online, the customer receives access to the web-based assessment tool. The assessment tool provides the customer with an up-to-date overview regarding the area of chemical management and its related issues, such as water emissions. After the first evaluation by the auditor, the audit takes place. After the audit, a clearly arranged and transparent report is issued.

4.1 Application

- Online registration via www.oeko-tex.com/detoxtozero, including a short description of your company and the selection of which testing institute to work with
- Confirmation of the received quotation (and terms of use)

4.2 Assessment

The assessment tool is a database which is used during the process both for data collection and to ensure a proper evaluation

- Log in to the DETOX TO ZERO online assessment with the received or existing user name and password
- Answer all relevant questions and provide following documents and information:
 - Chemical Management system or policy
 - Full inventory (including CAS and composition) and SDS of chemicals for MRSL check
 - Wastewater and sludge test report according to the DETOX TO ZERO MRSL from an accredited laboratory (includes the eleven chemicals groups defined by Greenpeace)
 - Environmental management (no certification required)
 - Chemical hazard emergency plan
 - Environmental emergency plan
 - Staff safety training records

4. Process to receive a DETOX TO ZERO Status Report

- › Site plan including drainage plan and all areas for the delivery, use and storage of chemicals
- › Licences or permits (if necessary) for the discharge of waste, air conditioning, storage or use of hazardous substances, wastewater discharge, use of water or wastewater treatment

4.3 Analysis of assessment data

- › First evaluation of the data provided by the facility including analysis of the chemical inventory list and the wastewater / sludge report
- › The testing institute will ask for missing data if required

4.4 Preparation and conducting of the audit

- › The auditor prepares the audit checklist based on the data provided
- › The testing institute arranges a suitable audit date with the facility
- › Audit tour through the facility (including taking photos and employee interviews): open all doors / departments, check wastewater treatment plant, wastewater outlet, sludge and waste storage, chemicals storage and handling, usage of PPE and handling of waste
- › Final evaluation of chemicals and the wastewater / sludge report

4.5 Data evaluation & report writing

- › Once the audit is complete, it provides an overall impression of the situation on site. The information is input in the assessment tool by the auditor
- › Comments based on the findings are used later for the reporting
- › DETOX TO ZERO by OEKO-TEX® Status Report is written based on the assessment and the audit (including publication of the data on www.oeko-tex.com/detoxtozero)

5. Status Report

The Status Report is a document, issued by an OEKO-TEX® testing institute. It provides the customer with an overview of the current situation within the company.

5.1 Content

The Status Report has the following elements:

- › General Company Information
- › Executive Summary Report
- › Corrective Actions
- › Liability
- › Wastewater and Sludge
- › MRSL
- › General Management
 - Management System / Organization (Responsibilities)
 - Chemical Management
 - Permits, Legal Requirements (License)
 - Environment, Health & Safety (EHS)
 - Production Process
 - Storage
- › Annex / Photos

5. Status Report

5.2 Scoring System

The assessment is carried out individually for each of the three performance areas (Wastewater and sludge, MRSL and General management).

The evaluation is based on at least one or more questions. Each question is scored. In case of an overall score, the sum of all actual scores is divided by the maximum score (e.g. for the General management part and its subsections).

DETOX TO ZERO is no certification system and therefore does not include exclusion criteria. There is no pass and fail. All recommendations and corrective actions issued can be seen as the path to best practice.

5.3 Status Report number

For each Status Report, OEKO-TEX® issues a unique report number. This report number has eight digits followed by a hyphen and one / two additional digits. The first eight digits refer to a customer while the digits following the hyphen refer to the amount of reports issued to that customer.

The first eight digits or the complete report number can be used for public validation on www.oeko-tex.com.

5.4 Validity of the Status Report

The Status Report is valid for one year based on the recommendation of OEKO-TEX®. The check should be made every year in order to track a status over a period of time and track and report on improvements and roadmaps. The new check is available three months before the date of expiry.

6. Communication with DETOX TO ZERO

6.1 Use and misuse of the Status Report

The Status Report can be used for internal and external communication. The results can be used as a Status Report. The Status Report can only be used for facilities (production sites) and not for products. The DETOX TO ZERO Status Report can only be used with the corresponding report number.

Any statement such as:

- > In compliance with
- > Fully covering
- > Certified according to

6. Communication with DETOX TO ZERO

- > Equivalent to
- > or similar to the mentioned terms (non-exhaustive list)

... the Greenpeace Detox campaign or requirements is not correct and will not be tolerated. In any of the mentioned cases, legal proceedings will be considered.

6.2 Publication of Status Report data

Once a stakeholder has the corresponding Status Report number or the company name, the Status Report can be validated on www.oeko-tex.com. Furthermore, and with the permission of the report owner, the OEKO-TEX® will publish the detected wastewater and sludge data on a responsive website that is available within the DETOX TO ZERO product section.

7. References and guidance tools

7.1 STeP by OEKO-TEX®

STeP (Sustainable Textile Production) is an independent certification system for sustainable textile production. Among other criteria, it analyses and evaluates existing production conditions with respect to the working conditions, the use of environmentally friendly technologies and products and the plant's impact on the environment.

STeP assesses, audits and certifies the following modules of the textile production chain:

1. Chemical Management
2. Environmental Performance
3. Environmental Management
4. Social Responsibility
5. Quality Management
6. Health and Safety

To qualify for certification according to STeP, facilities must meet the stipulated criteria in the modules above. Various rankings can be achieved based on the levels of performance defined within the standard, which is updated periodically. Companies have the option to combine DETOX TO ZERO by OEKO-TEX® with the STeP certification. The results of the DETOX TO ZERO assessment will be included in the final STeP report and in the STeP certificate.

For further details please connect to the OEKO-TEX® homepage www.oeko-tex.com or contact one of the testing institutes (as given in Annex 1).

7. References and guidance tools

7.2 Detox Campaign by Greenpeace

The Detox campaign was launched by Greenpeace in 2011 to address the widespread use of hazardous chemicals in the manufacturing of clothes, which were being released into waterways. Several international brands, retailers and suppliers committed themselves to eliminate toxic, persistent and hormone-disrupting chemicals from their products and production processes by 2020. The key elements of the Detox Commitment are:

- Chemicals management - specifically setting a Manufacturing Restricted Substances List, which initially focused on 11 priority hazardous chemical groups and testing for them in wastewater discharges and sludge
- Transparency - of the wastewater and sludge testing results, to be published by the supplier on an online platform, and the publication of suppliers lists to include wet processing (washing and dyeing) suppliers (Tier 2/3)
- Substitution and elimination - with a particular focus on alkylphenol ethoxylates (APEOs), per- and polyfluorinated chemicals (PFCs) and Phthalates

More information about the Detox campaign can be found on the Greenpeace website.

7.3 ZDHC compliance

ZDHC (Zero Discharge of Hazardous Chemicals) is an industry-driven initiative which provides a platform to consolidate questions raised by the Greenpeace Detox campaign. As a forum, the ZDHC Group is striving to reduce the complexity raised by the Greenpeace 2020 goals. OEKO-TEX® supports the ZDHC initiative and ensures, through various OEKO-TEX® services, compliance with the ZDHC MRSL.

Wastewater and sludge tests conducted according to the ZDHC MRSL requirements and limits are acknowledged as high standard addressing hazardous substances in effluents. Such test reports issued by accredited laboratories are accepted within the framework of DETOX TO ZERO.

Requirements of the DETOX TO ZERO MRSL (e.g. reporting limits, additional substances) that go beyond ZDHC are analysed during the MRSL screening. Criteria not or insufficiently covered are outlined as recommendations in the DETOX TO ZERO Status Report.

Annex 1 – OEKO-TEX® Institutes

The testing institutes are approved and authorised by the OEKO-TEX® Service Ltd. to provide tests, audits and other services in connection with OEKO-TEX® products. The following institutes currently offer certification, licensing and a status report according to STANDARD 100, STeP, DETOX TO ZERO, MADE IN GREEN, ECO PASSPORT and / or LEATHER STANDARD. Current address and contact information can always be found on the OEKO-TEX® homepage (www.oeko-tex.com).

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
1. ALKYLPHENOLS (AP'S) / ALKYLPHENOETHOXYLATES (APEO'S) (NON EXHAUSTIVE LIST)			
Nonylphenol (n-nonyl and iso-nonyl)	Various 11066-49-2 25154-52-3 104-40-5 90481-04-2 84852-15-3	1 µg/l	0.2 mg/kg
Octylphenol (n-octyl and iso-octyl)	Various 140-66-9 27193-28-8 1806-26-4		
Heptylphenol (branched and linear)	Various		
Pentylphenol (branched and linear)	Various		
Nonylphenoethoxylates (NPEO) (n-nonyl and iso-nonyl)	Various 9016-45-9 26027-38-3 68412-54-4 127087-87-0 37205-87-1		
Octylphenoethoxylates (OPEO) (n-octyl and iso-octyl)	Various 9002-93-1 9036-19-5 68987-90-6		
2. PHTHALATES			
Benzylbutylphthalate (BBP)	85-68-7	1 µg/l	0.3 mg/kg
Dibutylphthalate (DBP)	84-74-2		
Diethylphthalate (DEP)	84-66-2		
Dimethylphthalate (DMP)	131-11-3		
Di-(2-ethylhexyl)phthalate (DEHP)	117-81-7		
Di-(2-methoxyethyl)phthalate (DMEP)	117-82-8		
Di-C6-8-branched alkylphthalates, C7-rich (DIHP)	71888-89-6	best current testing technology with corresponding detection limit	best current testing technology with corresponding detection limit
Di-C7-11-branched and linear alkylphthalates (DHNUP)	68515-42-4	1 µg/l	0.3 mg/kg

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
Dicyclohexylphthalate (DCHP)	84-61-7	1 µg/l	0.3 mg/kg
Dihexylphthalates, branched and linear (DHxP)	68515-50-4		
Di-iso-butylphthalate (DIBP)	84-69-5		
Di-iso-hexylphthalate (DIHxP)	71850-09-4		
Di-iso-octylphthalate (DIOP)	27554-26-3		
Di-iso-nonylphthalate (DINP)	28553-12-0		
	68515-48-0		
Di-iso-decylphthalate (DiDP)	26761-40-0		
	68515-49-1		
Di-n-propylphthalate (DPP)	131-16-8		
Di-n-hexylphthalate (DHP)	84-75-3		
Di-n-octylphthalate (DNOP)	117-84-0		
Di-n-nonylphthalate (DNP)	84-76-4		
Di-n-pentylphthalate (DPP)	131-18-0		
Di-iso-pentylphthalate (DPP)	605-50-5		
Iso-pentyl-n-pentylphthalate (DPP)	776297-69-9		
Dipentylphthalate, branched and linear (DPP)	84777-06-0		
3. BROMINATED, CHLORINATED AND OTHER FLAME RETARDANTS		0.05 µg/l	0.03 mg/kg
Polybromobiphenyls (PBBs)	59536-65-1		
Monobromobiphenyls (MonoBB)	Various		
Dibromobiphenyls (DiBB)	Various		
Tribromobiphenyls (TriBB)	Various		
Tetrabromobiphenyls (TetraBB)	Various		
Pentabromobiphenyls (PentaBB)	Various		
Hexabromobiphenyls (HexaBB)	Various		
Heptabromobiphenyls (HeptaBB)	Various		
Octabromobiphenyls (OctaBB)	Various		
Nonabromobiphenyls (NonaBB)	Various		
Decabromobiphenyl (DecaBB)	13654-09-6		
Polybrominated diphenyl ethers (PBDEs)	Various		
Monobromodiphenylethers (MonoBDEs)	Various		
Dibromodiphenylethers (DiBDEs)	Various		
Tribromodiphenylethers (TriBDEs)	Various		
Tetrabromodiphenylethers (TetraBDEs)	Various 40088-47-9		

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
Pentabromodiphenylethers (PentaBDEs)	Various 32534-81-9	0.05 µg/l	0.03 mg/kg
Hexabromodiphenylethers (HexaBDEs)	Various 36483-60-0		
Heptabromodiphenylethers (HeptaBDEs)	Various 68928-80-3		
Octabromodiphenylethers (OctaBDEs)	Various 32536-52-0		
Nonabromodiphenylethers (NonaBDEs)	Various 63936-56-1		
Decabromodiphenylether (DecaBDE)	1163-19-5		
Tri-(2,3-dibromopropyl)phosphate (TRIS)	126-72-7	0.5 µg/l	0.25 mg/kg
Tris(2-chlorethyl)phosphate (TCEP)	115-96-8	0.05 µg/l	
Hexabromocyclododecane (HBCDD) and all main diastereomeres identified (alpha-, beta-, gamma-)	3194-55-6 134237-50-6 134237-51-7 134237-52-8 25637-99-4	0.5 µg/l	0.25 mg/kg
Tetrabromo-bisphenol A (TBBA)	79-94-7	0.5 µg/l	0.25 mg/kg
Bis(2,3-dibromopropyl)phosphate (BIS)	5412-25-9		
Other Flame retardants			
Tris(1,3-dichlorisopropyl)phosphat (TDCPP)	13674-87-8	0.5 µg/l	0.25 mg/kg
Tris-(aziridinyl)-phosphin oxide (TEPA)	545-55-1		
Boric acid	10043-35-3 11113-50-1		
Diboron trioxide	1303-86-2		
Disodium tetraborate, anhydrous	1303-96-4		
	1330-43-4		
	12179-04-3		
Disodium octaborate	12008-41-2		
Tetraboron disodium heptaoxide, hydrate	12267-73-1		
Flame retardants which contain toxic metals like antimony or arsenic	Various		
Antimony trioxide	1309-64-4		
Antimony pentoxide	1314-60-9		

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
Tri-o-cresyl phosphate	78-30-8	0.5 µg/l	0.25 mg/kg
Trixylyl phosphate	25155-23-1		
4. HAZARDOUS DYES (BANNED AZO, ALLERGENIC, CARCINOGENIC)			
Arylamines (released from Azo colorants or in free manner)			
4-Aminobiphenyl; 4-Aminodiphenyl	92-67-1	0.01 µg/l	0.01 mg/kg
Benzidine	92-87-5		
4-Chloro-o-toluidine	95-69-2

1,1,1,2-Tetrachloroethane	630-20-6		
1,1,2,2-Tetrachloroethane	79-34-5		
Pentachloroethane	76-01-7		
1,1-Dichloroethylene	75-35-4		
	540-59-0		
1,2-Dichloroethylene, cis and trans	156-60-5		
	156-59-2		

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
Trichloroethylene	79-01-6	1 µg/l	0.3 mg/kg
Tetrachloroethylene	127-18-4		
1,2,3-Trichloropropane	96-18-4		
Hexachlorobutadiene	87-68-3		
Other VOCs			
Methyl-ethyl ketone	78-93-3	1 µg/l	0.1 mg/kg
Ethylbenzene	100-41-4		
Xylene	1330-20-7		
o-Xylene	95-47-6		
m-Xylene	108-38-3		
p-Xylene	106-42-3		
Cyclohexanone	108-94-1		2 mg/kg
2-Ethoxyethyl acetate	111-15-9		10 mg/kg
Acetophenone	98-86-2		0.1 mg/kg
2-Phenyl-2-propanol	617-94-7		20 mg/kg
Bis(2-methoxyethyl) ether	111-96-6		0.1 mg/kg
Styrene	100-42-5		50 mg/kg
Benzene	71-43-2		
Toluene	108-88-3		
1-Methyl-2-pyrrolidone (NMP)	872-50-4		
N,N-Dimethylacetamide (DMAc)	127-19-5		20 mg/kg
N,N-Dimethylformamide (DMF)	68-12-2	0.1 mg/kg	
2-Ethoxyethanol	110-80-5	50 µg/l	–
Ethylene glycol dimethyl ether (EGDME)	110-71-4		–
2-Methoxyethanol	109-86-4		–
2-Methoxyethylacetate	110-49-6		–
2-Methoxypropylacetate	70657-70-4		–
Phenol	108-95-2		–
Formamide	75-12-7		1 µg/l
9. CHLOROPHENOLS			
Pentachlorophenol (PCP)	87-86-5	0.5 µg/l	0.025 mg/kg
Tetrachlorophenol (TeCP)	25167-83-3		
2,3,4,5-Tetrachlorophenol	4901-51-3		
2,3,4,6-Tetrachlorophenol	58-90-2		
2,3,5,6-Tetrachlorophenol	935-95-5		

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
Trichlorophenol (TrCP)	25167-82-2	0.5 µg/l	0.025 mg/kg
2,3,4-Trichlorophenol	15950-66-0		
2,3,5-Trichlorophenol	933-78-8		
2,3,6-Trichlorophenol	933-75-5		
2,4,5-Trichlorophenol	95-95-4		
2,4,6-Trichlorophenol	88-06-2		
3,4,5-Trichlorophenol	609-19-8		
Dichlorophenols (DiCP)	25167-81-1		
2,3-Dichlorophenol	576-24-9		
2,4-Dichlorophenol	120-83-2		
2,5-Dichlorophenol	583-78-8		
2,6-Dichlorophenol	87-65-0		
3,4-Dichlorophenol	95-77-2		
3,5-Dichlorophenol	591-35-5		
Monochlorophenols (MCP)	Various		
2-Chlorophenol	95-57-8		
3-Chlorophenol	108-43-0		
4-Chlorophenol	106-48-9		
Salts and Esters from the above mentioned Chlorophenols	Various		
10. CHLORINATED PARAFFINS			
Short-chain chlorinated paraffins (SCCP), C10-13	85535-84-8	0.4 µg/l	0.03 mg/kg
Medium-chain chlorinated paraffins (MCCP), C14-17	85535-85-9		
11. HEAVY METALS AND THEIR COMPOUNDS			
Antimony (Sb)	7440-36-0	1 µg/l	1 mg/kg
Arsenic (As)	7440-38-2		
Lead (Pb)	7439-92-1		
Cadmium (Cd)	7440-43-9	0.1 µg/l	
Chromium (Cr)	7440-47-3	1 µg/l	
Cr(VI)	18540-29-9		
Cobalt (Co)	7440-48-4		
Copper (Cu)	7440-50-8		
Nickel (Ni)	7440-02-0	0.05 µg/l	
Mercury (Hg)	7439-97-6		
Zinc (Zn)	7440-66-6		
Manganese (Mn)	7439-96-5	1 µg/l	4 mg/kg
			1 mg/kg

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge	
12. POLYCYCLIC AROMATIC HYDROCAROBENS (PAH'S)				
Acenaphthene	83-32-9	1 µg/l	0.6 mg/kg	
Acenaphthylene	208-96-8			
Anthracene	120-12-7			
Benzo[a]anthracene	56-55-3			
Benzo[a]pyrene	50-32-8			
Benzo[b]fluoranthene	205-99-2			
Benzo[ghi]perylene	191-24-2			
Benzo[k]fluoranthene	207-08-9			
Chrysene	218-01-9			
Dibenzo[a,h]anthracene	53-70-3			
Fluoranthene	206-44-0			
Fluorene	86-73-7			
Indeno[1,2,3-cd]pyrene	193-39-5			
Naphthalene	91-20-3			0.1 mg/kg
Phenanthrene	85-01-8			0.6 mg/kg
Pyrene	129-00-0			
GENERAL REQUIREMENTS				
pH-value		6.0-9.0		
Max. effluent temperature		40°C		
Color / spectral absorption at 436 nm		10 m-1		
Color / spectral absorption at 525 nm		7 m-1		
Color / spectral absorption at 620 nm		5 m-1	-	
Absorbable organic halogens AOX (as Cl)		1 mg/l		
Chemical oxygen demand COD (as O ₂)		200 mg/l		
Biochemical oxygen demand BOD ₅ (as O ₂)		50 mg/l		
Total suspended solids		50 mg/l		
Phosphor total as P		5 mg/l	-	
Ammonia as NH ₄ -N		10 mg/l		
Sulphides (as S ₂)		2 mg/l		

Annex 2 – DETOX TO ZERO MRSL

Substance	Cas No.	Output: Wastewater	Output: Sludge
Sum PAH (16 components)		-	6 mg/kg dry substance
Sum chlorinated hydrocarbons (aliphatic and aromatic)			560 mg/kg dry substance
Total mineral oil C10 - C20			5600 mg/kg dry substance
Total mineral oil C20 - C40			0,8 mg/kg dry substance
PCB (sum 7 congeners) 62			

Terms of Use

The OEKO-TEX® Terms of Use (ToU) apply for all OEKO-TEX® products. The ToU can be found under www.oeko-tex.com/ToU. Please use the form below to confirm the OEKO-TEX® Terms of Use and send it to the responsible OEKO-TEX® Institute.

By putting his/her signature at the signature block below, the user confirms that he/she has read, understood and agrees fully with the Terms of Use and conditions contained herein, including its Annexes.

The notice details of the user are as follows:

Company _____
Salutation / Name / Surname _____
Street No. _____
ZIP-Code _____
City _____
State _____
Country _____
Phone / FAX _____
Homepage _____
E-mail _____

Responsible person:

Name _____
Phone / FAX _____
E-mail _____

These Terms must be signed by two authorised representatives of the user, one of which is a member of its board and the other, preferably by the individual responsible within the user's organisation for the DETOX TO ZERO by OEKO-TEX® verification and reporting process.

These Terms of use are hereby signed for and behalf of

The user, namely _____
Registered as a _____
Under the laws of _____
Having its registered office address at _____
Date, place _____
Director and STeP authorised signatory _____

.....
